Mercury Nah Easy!

It damages your body and can cause serious health problems.

Lungs

Mercury fumes are extremely dangerous, damaging your lungs and getting into your bloodstream.

Babies & Children

Mercury can lower your body's defenses against other diseases.

Immune System

It can affect mothers, damage a baby's brain & slow down mental development in children.

Liver & Kidneys

Like malaria, mercury can damage your liver and kidneys. Alcohol can make this worse.

Brain & Nerves

Mercury can damage your brain, vision and hearing, and cause mental problems.
Careful with Quicksilver

Reduce the risks to you and your family.

Don’t inhale mercury fumes
Use a retort that captures the mercury.
Mercury can get into the body through small cuts on the skin.
Handle with care
Use gloves, masks other safety equipment.
Find out about Gold Cubes, Concentrators & other equipment.

Burning gold is dangerous to everyone living or working nearby.

Pregnant women & babies are at higher risk.

Avoid fish from polluted rivers
Fish that eat other fish have higher mercury levels.

Increase your gold recovery and save money.

Try new equipment that needs less ‘silver’
