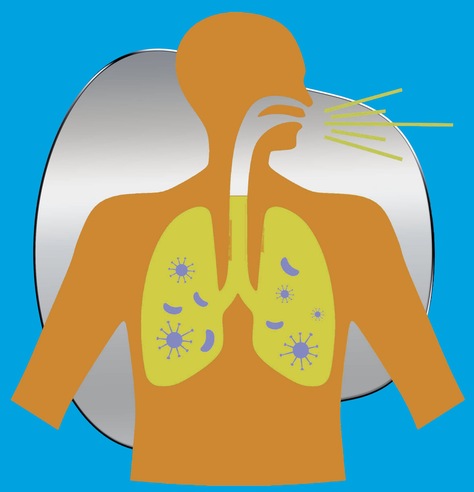
Say NO to Mercury

Mercury damages your body and can cause serious health problems.

Lungs

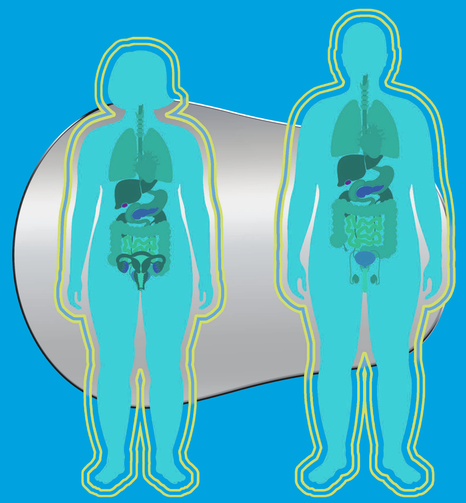


Mercury fumes are extremely dangerous, damaging your lungs and getting into your blood stream.

Babies & Children

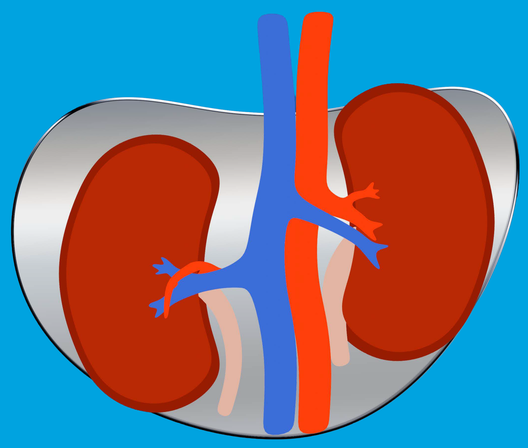
Mercury can affect mothers, damage a baby's brain and slow down mental development in children.

Immune System



Mercury can lower your body's defenses against other diseases.

Kidneys



Like malaria, mercury can damage your liver and kidneys. Alcohol can make this worse.

Brain & Nerves

Mercury can damage your brain, vision and hearing and cause mental problems.
